Education

D Y Patil College of Engineering, Pune Sep 2024 – Present
B.Tech in Information Technology (CGPA: 8.82)

Om Public School, Jaunpur 2024
CBSE Class XII (80.8%)

St. Xavier's School, Jaunpur 2022
CBSE Class X (88.8%)

Technical Skills

MERN Stack: MongoDB, Express.js, React.js, Node.js, REST APIs, JWT Authentication, MVC Architecture
Frontend: React.js, Next.js, HTML5, CSS3, JavaScript , TypeScript, Three.js
Backend & Databases: Node.js, Express.js, MongoDB, MongoDB Atlas, MySQL, PostgreSQL, SQLite
Tools & Services: Git, GitHub, Postman, Clerk Auth, Gemini API, Domain & Deployment Setup
Languages: JavaScript, TypeScript, C++, Java, Python, SQL
Also Familiar With: Java & Spring Boot, Hibernate, Python (FastAPI, Scikit-learn, Pandas, NumPy), Anomaly Detection
Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Experience & Leadership

Technical Lead September 2026 – Present
Neura-Ai-Club-DYPCOE

- Appointed Technical Lead of the college's AI club, guiding 40+ members on web and AI project development.
- Building and maintaining the club's official website using React.js and Node.js

Freelance Full-Stack Web Developer September 2026
madeyoulookbysamiksha.in *Remote*

- Designed, developed and deployed a live client website end to end using React.js and Node.js + MongoDB from requirements to production.
- Registered and configured the custom domain, set up hosting on Vercel, and delivered a responsive, mobile-friendly UI to users.

Projects

AgroW – Hyperlocal Farming Community Platform | *MongoDB, Express.js, React, Node.js, Clerk Auth* Live

- Built a full-stack MERN platform connecting farmers with agricultural experts and service providers.
- Designed RESTful APIs in Express.js for authentication, communities, marketplace and discussion forums, following MVC architecture with MongoDB data models.
- Integrated Clerk for secure authentication and user management, and the Gemini API for multilingual AI assistance.

Horizon – Meteor Trajectory Analysis & Visualization Platform | *Next.js, React, Three.js, FastAPI, Python* Live

- Built a full-stack scientific visualization platform processing 50,263 real meteor observations from the Global Meteor Network.
- Developed searchable event catalogues, orbital comparison dashboards, radiant sky maps and velocity-time charts with React and Three.js.
- Applied Monte Carlo simulation in a Python/FastAPI backend to estimate uncertainty in meteor velocity and orbital parameters.

MPLADS Risk Tracker – AI-Powered Scheme Monitoring Platform | *Python, FastAPI, Scikit-learn* GitHub

- Developed a platform that analyzes MPLADS projects to flag anomalies, delays and cost inefficiencies, exposed through FastAPI REST APIs for a web frontend.
- Implemented Isolation Forest anomaly detection and a composite 0–100 risk scoring engine using features from project cost, fund utilization and timelines.
- Applied TF-IDF similarity to detect potentially duplicate project descriptions.

Achievements & Certifications

- Qualified for the final round of the **IIT Mandi Hackathon**; participated in multiple national-level hackathons building software solutions in teams.
- **TCS iON NQT (IT)**: scored 78.99% overall, with 100% in the Programming Hands-On assessment (Python and C++).
- Solved 300+ DSA problems across LeetCode and GeeksforGeeks.
- **Full Stack Web Development** – Jyesta (React.js, Node.js, Express.js, MongoDB, REST APIs); **Data Science** – Code With Harry (Python, Pandas, Scikit-learn).
